

CRAPS

A HIGH-ENERGY,
RAPID-FIRE DICE GAME!

Craps is an exciting, fast-action game that often creates bursts of cheer throughout the casino. Although the game may look difficult, this guide will help any player understand the different bets that can be made on the craps table.

HOW to PLAY

One player, the "shooter," throws the dice. All wagers must be placed before the shooter throws the dice. You don't have to roll the dice to win at this game. The dice are passed around the table and you may continue to bet while other players roll. The types of wagers that can be made are:

1-PASS LINE

An even money bet. (Bet \$5, get paid \$5.) You win if the first roll (come out roll) is a "natural" 7 or 11, and lose if the roll is "craps" 2, 3, or 12. Any other number rolled is the point, which can be distinguished by the placement of the puck on the point number. That point must be thrown again before a 7 to win.

2-DON'T PASS LINE

The opposite of the pass line. If the first roll of the dice is a "natural" 7 or 11, you lose; if it is a 2 or 3, you win; and if it is a 12, you push (tie). If the first roll is a point, a 7 must be rolled before that point is repeated in order to win.

Must be 21 or older. All casino games owned and operated by the Kansas Lottery.
Anyone enrolled in the Kansas Voluntary Exclusion Program is not eligible.

HOW TO PLAY

HOW TO PLAY

3-ODDS

Once a point is established on the first roll or a come point on a succeeding roll, you may take the odds and win if the point or come points are made before a 7. Odds can be taken up to: 3X on 4 or 10, 4X on 5 or 9, and 5X on 6 or 8. "Don't Pass" or "Don't Come" odds are in reverse: you must lay the odds in order to win.

4-COME BETS

An even money bet with the same rules as a pass line bet. Come bets can be made any time after the first roll when a shooter has a point to make. You win on "natural" 7 or 11 and lose on "craps" 2, 3, or 12. Any number that comes up is a "come point" and must be rolled again before a 7 is thrown in order to win.

5-DON'T COME BETS

Opposite of come bets except that a first roll of 2 or 3 wins and a 12 is a push; you lose on 7 or 11. When any other number is thrown, your bet goes against that number. You win if a 7 is thrown before the point you're against is repeated.

6-PLACE BETS

After a point has been established, you can then make a place bet in the following manner. If you feel that there will be a 4, 5, 6, 8, 9, or 10 rolled, you may place a bet on any or all of those numbers. In turn, the dealer will take your bet and put it on the number that you want to place. Place bets pay different odds depending on the number.

4 and 10 pay 9 to 5 (Bet \$5, get paid \$9)

5 and 9 pay 7 to 5 (Bet \$5, get paid \$7)

6 and 8 pay 7 to 6 (Bet \$6, get paid \$7)

You have the option to call a place bet off anytime you want.

7-FIELD BETS

The field bet is a one roll wager. When a 3, 4, 9, 10, or 11 is rolled, you are paid even money. If the roll is a 2 or 12, you get paid double.

8-PROPOSITION BETS

Can be made on any roll of the dice. You make this bet by throwing your bet to the stickperson (dealer who is calling all numbers and controlling the dice with the stick) in the center of the table.

Proposition bets are as follows:

- Any craps - 2, 3, or 12 pay 7 to 1 - Any 7 pays 4 to 1
- Ace deuce (3) - pays 15 to 1
- 11 pays 15 to 1
- 12 pays 30 to 1
- 2 pays 30 to 1
- Hop bets - Made on any given combination on the next roll

EXAMPLE: "5-4 on the hop" will be paid 15 to 1 if the dice roll is a 9 made with a 5 on one dice and a 4 on the other

EXAMPLE: "3-3 on the hop" will be paid 30 to 1 if the dice roll is a 6 made with a 3 on both dice.

- Hardways-Wagers are made on a given pair being rolled before a 7 or an "easy" combination of that number, i.e. Hard 4 (2 & 2), hard 6 (3 & 3), hard 8 (4 & 4), and hard 10 (5 & 5). The only way you can lose is if the number is rolled any other way than with 2 matching numbers (a pair) or if a 7 is rolled.

Hardways are paid as follows:

- 4 and 10 pay 7 to 1
- 6 and 8 pay 9 to 1
